DDJ-1000 TRAKTOR MAPPING – v7.1

v7 NEW FEATURES:

- 16x Filter SuperKnobs (p30)
- Access all 9x MixerFX (p30)
- Resonant Filter (p31)
- Turntable FX (p16)
- Remix decks recorder (p46)
- STEMS (p50)
- Tempo enlarger (p20)
- Loop Backwards adjust (p21)
- 4x Echo out (p35)

v7 BUG FIXES:

- Can now restart bome
- Can now swap usb cable
- Loads in 3 seconds
- Perfect timestamps (p13)
- LED warning blinks (p9)
- BeatFX (p27)
- Classic / Parallel (p23)
- Everything for all decks

v6 FEATURES:

- Jogscreens (p13)
- 7x jogFX chains (p33)
- 21x padFX (p39)
- Preview player (p25)
- TonePlay (p43)
- Slicer (p45)
- 3x shift layers (p4)

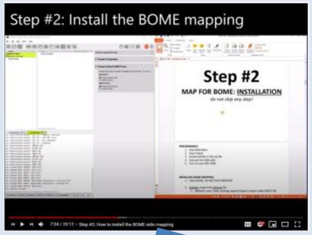
HOW TO LEARN THIS MAPPING?

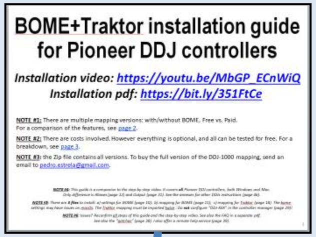
Installation:

Step-by-step video (20 min)



Step #2: Install the BOME mapping
Step #2
MAP FOR BOME: INSTALLATION
do not skip any step!
7:24 / 20:12 • Step #2: How to install the BOME-side mapping

Installation guide (50 pages)



BOME+Traktor installation guide for Pioneer DDJ controllers

Installation video: *https://youtu.be/MbGP_ECnWiQ*

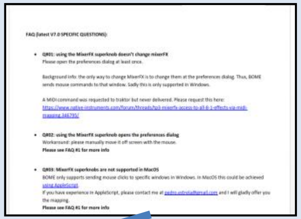
Installation pdf: *https://bit.ly/351FtCe*

NOTE #1: There are multiple mapping versions: with/without BOME, Free vs. Paid. For a comparison of the features, see page 2.

NOTE #2: There are costs involved. However everything is optional, and all can be tested for free. For a breakdown, see page 3.

NOTE #3: the Zip file contains all versions. To buy the full version of the DDJ-1000 mapping, send an email to pedro.estrela@gmail.com.

FAQ (6 pages)



FAQ (latest V7.0 SPECIFIC QUESTIONS):

- **Q#01: using the MixerFX superknob doesn't change mixerFX**
  Please open the preferences dialog at least once.

  Background info: the only way to change MixerFX is to change them at the preferences dialog. Thus, BOME sends mouse commands to that window. Sadly this is only supported in Windows.

  A MIDI command was requested to traktor but never delivered. Please request this here: https://www.native-instruments.com/forum/threads/tp3-mixerfx-access-to-all-8-1-effects-via-midi-mapping.346795/
- **Q#02: using the MixerFX superknob opens the preferences dialog**
  Workaround: please manually move it off screen with the mouse.
  Please see FAQ #1 for more info
- **Q#03: MixerFX superknobs are not supported in MacOS**
  BOME only supports sending mouse clicks to specific windows in Windows. In MacOS this could be achieved using AppleScript.
  If you have experience in AppleScript, please contact me at pedro.estrela@gmail.com and I will gladly offer you the mapping.
  Please see FAQ #1 for more info

Mic1 Volume

Mic2 Volume

Mic Hi Adjust / STEM FX (while pressing pad mode 8)

Mic Low adjust / STEM FILTER (while pressing pad mode 8)

- The Mic Equalization is done in hardware and cannot be disabled
- If you use Mics, do NOT use STEM FX or Filter.
  - This is very easy – the new functions only activate when you press a very specific pad as a new shift
  - Instead, just set them with your mouse

NOTES / FAQS

RELEASE NOTES v7.0.0:

KNOWN MAPPING ISSUES:

- Using MixerFX superknob opens the preferences window
  - Workaround: move it off screen
- MixerFX superknobs are not supported in macOS
  - If you know AppleScript please contact me
- Timestamp doesn’t work on deck 3&4
  - This is a limitation of DN-HC4500. A workaround will be released later

NON-MAPPING BUGS:

- Pioneer effects are only on the master channel
  - This is by design of the DDJ-1000 hardware
- Small loops (1/2, 1/4, etc) are displayed as "zero"
  - Only integer digits can be displayed on screen
- Feature “X” or “Y” is supported in Rekordbox / VirtualDJ, but not here
  - The MIDI firmware has several bugs and missing features
  - Please help reporting this to Pioneer, as explained in [in this link]()

BOME installation video: https://www.youtube.com/watch?v=MbGP_ECnWiQ

DDJ-1000/SRT: Empty sub-pages

Warning: All main pad modes DO NOT have anything on the “right” sub-pages. Going there shows an empty set of pads.

In this case just press “left” to return to the normal sub-pages.

Differences of Mac vs Windows versions

MacroFX SuperKnobs are supported in both Mac and Windows.
However, MixerFX SuperKnobs are only support for Windows.

This could be done in mac as well using AppleScript.

If you have experience in AppleScript please contact me.

9x mixerFX access request: https://www.native-instruments.com/forum/threads/abc.346795/

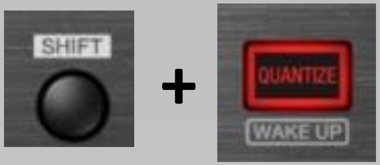
d) Delete/Disable the CH3 and CH4 presets in BOME

e) Delete the HC-4500 page in the Traktor controller manager.
(this will remove timestamp support)

DDJ-1000: Reset and Startup



Manual Reset

To reset the mapping use “shift+quantize”.
It takes some seconds, and sometimes needs to be done twice.
This procedure enables you to restart BOME or swap the USB cable.

Also use this method first if you have weird behavior like no Leds, the needle doest turn, or Leds do not match the traktor GUI.

If possible, prefer starting the components in a specific sequence:
#0 USB cable ON
#1 laptop ON
#2 DDJ ON
#3 BOME ON
#4 Traktor ON

ENJOY!
